SUMMARY

AI Engineer specializing in Generative AI, LLMs, and MLOps. Experienced in building agentic AI systems with LangChain/LangGraph, fine-tuning transformers, and deploying ML pipelines on AWS with Docker and CI/CD.

EXPERIENCE

AI/ML Engineer

Mar 2025 – May 2025

DevelopersHub Corporation

Remote

- Built LSTM-based sentiment analysis achieving 90% accuracy on the IMDB dataset (50K+ reviews).
- Developed FinBERT financial sentiment classifier with 93% accuracy on domain-specific data.
- Engineered fake news detection pipeline using NLP and ensemble ML classifiers.
- Implemented credit risk prediction with SMOTE + Random Forest, achieving 92% accuracy.
- Fine-tuned BERT for multi-class emotion recognition, optimizing F1-score.

PROJECTS

MedVision AI | *LangGraph, FastAPI, Weaviate, GPT-4o, BLIP*

2026

- Built a multimodal medical AI assistant processing images and text for clinical insights.
- Implemented hybrid retrieval with re-ranking, improving answer relevance by 35%.
- Designed dual-memory system for personalized patient conversations.

QanoonAI – Legal AI Agent | *LangGraph, React, FastAPI, Docker, AWS*

2026

- Developed autonomous legal AI agent with corrective RAG over multiple knowledge sources.
- Integrated real-time voice interaction using Whisper ASR.
- Deployed containerized system on AWS with Supabase authentication.

English–Urdu Neural Machine Translation | *PyTorch, Transformers*

2025

- Built encoder-decoder transformer from scratch with multi-head attention.
- Achieved BLEU score of 22.96 on English-to-Urdu benchmarks.

Vehicle Insurance Prediction | *FastAPI, Docker, AWS, GitHub Actions*

2025

- Built end-to-end MLOps pipeline from ingestion to deployment on AWS EC2.
- Automated CI/CD with GitHub Actions for model retraining and redeployment.

EDUCATION

National University of Sciences and Technology (NUST)

2025 – Present

M.S. in Artificial Intelligence

COMSATS University Islamabad, Sahiwal Campus

2020 – 2025

B.S. in Electrical Engineering

TECHNICAL SKILLS

Languages: Python, Java

ML & Deep Learning: PyTorch, TensorFlow, Scikit-learn, Hugging Face, LoRA, QLoRA, PEFT

GenAI & Agents: LangChain, LangGraph, LangSmith, CrewAI, RAG, Prompt Engineering

Computer Vision: CNN, R-CNN, U-Net Vision Transformer (ViT), OpenCV

MLOps & Cloud: Docker, MLflow, DVC, Git, GitHub Actions, AWS (EC2, S3, ECR)

Backend & Data: FastAPI, Streamlit, MySQL, PostgreSQL, Weaviate, ChromaDB, Pinecone

Speech & Multimodal: OpenAI Whisper, GroqCloud, gTTS
